

## 893B Corona Two-Way Speaker System

Nothing quite takes the place of experience. And Altec used all of its many years of experience in high quality sound reproduction to create the 893B Corona—a bookshelf loudspeaker system that can totally fill the average home listening room with exciting and satisfying music. Featuring a precision engineered two-way loudspeaker system, the Corona combines a high compliance 10-inch frame bass driver with an effective piston area of 52 square inches, a 3 square inch high frequency direct radiator and a custom-tailored 2500 Hz dividing network with a 3-position attenuator control—all installed in a solidly constructed sealed enclosure. The results: exceptionally smooth, distortion-free performance throughout the entire audible sound spectrum—yet with all the body and brilliance that modern recording techniques now provide.

Handsomely finished in hand-rubbed oiled walnut with a complementary grille of dark textured fabric, the Corona's efficient design means big performance with smaller amplifiers. For those who wish to use higher power amplifiers, however, the Corona system has been designed to take up to 45 continuous Watts of input without damage. Whether at background music levels or high volume listening, the Corona delivers the kind of performance that you normally expect to find in loudspeaker systems many times its size.

The Altec 893B Corona. An experience in sound through sound experience.

### SPECIFICATIONS

**Speaker Components:** Low Frequency — High efficiency 10-inch frame bass driver with an effective piston area of 52 square inches.  
High Frequency — 3 square inch direct radiator

**Nominal Impedance** — 8 ohms

**Power Rating** — 45 Watts\*

**Crossover Frequency** — 2500 Hz

**Pressure Sensitivity** — 91.0 dB SPL\*\*

**Enclosure** — Selected oiled walnut veneers on high density compressed wood

**Finish** — Hand-rubbed oiled walnut

**Grille** — Dark textured grille fabric on snap-in mounting board

**Dimensions** — 22"H x 12 1/4"W x 9 1/2"D  
558mm H x 371mm W x 301mm D

**Weight** — 25 lbs. 11.3 Kg

**Shipping Weight** — 31 lbs. 14.1 Kg

\* May be used for home entertainment use with amplifiers having up to equal continuous power rating.

\*\* Measured at 4 feet, source of band-limited pink noise 500 to 3 kHz, 1 Watt input at rated impedance.

The sound of experience
