

- Note: Unless otherwise specified
1. All resistors are 1/2 watts ±5%
 2. All capacitors are in microfarads
 3. Transistors Q1, 8, 9, Q201 & Q202 must have required heat sinks, Wakefield Eng. Type MF-207
 4. Shown for 600 Ω operation
 5. Matching - V, matched to within 10 mV at I_b = 1 mA
 6. Data of Q4 & Q5 should be between 80 and 100
 7. All DC voltage measured with VTVM
 8. For stereo operation install J52 and interconnect left & right Volumes with CBS Cable Assy. No. A26715
 9. J52 pre-wired in units Ser. # 180 up
