Recordable Media Group International B.V., Oosterhout, The Netherlands has been accumulating 37 years of non-interrupted experience on magnetic tape manufacturing. With their highly skilled and experienced personnel and management, RMG International is fully dedicated to magnetic tape. A slim organisational structure enables low overhead. When EMTEC closed down, RMG International acquired the EMTEC production and quality assurance equipment necessary to convert & complete the Oosterhout production lines to the EMTEC standards for audio tape production.

RMG International has the EMTEC

- production know how
- formulations and
- patents.

Former EMTEC key personnel is assisting in Oosterhout in order to maintain the EMTEC standards. Following the installation of the EMTEC equipment and positive results of comprehensive studies on availability of the necessary raw materials, RMG International started prototype coating for audio pancake tape and is now preparing for studio tape.

RMG International, brief History

- 1968 Magnetic tape production for open reel and cassette tape started in RMG International Oosterhout plant when it was a Philips division.
- 1981 Joint Venture Philips-Dupont, PD Magnetics B.V., on magnetic tape production, brand name PDM. 1/2" Video tape for Video 2000 and VHS, 3480/90 data cartridges for IBM tape storage systems.
- 1991 Installation of state of the art, new plant.
- 1993 SK, Germany, takes over the Oosterhout plant and renames into MPO B.V. (Magnetic Products Oosterhout B.V.).
- 1998 New, state of the art, coating line goes into operation.
- 2004 April, renamed to Recordable Media Group International B.V..
- 2004 November, acquisition of assets and know how for the production of audio pancakes for duplication and blank loading and for audio studio tape from EMTEC Munich plant.
